Description

The development comprises the construction of a new five court sports hall with ancillary changing, storage and plant accommodation with an approximate floor area of 700sqm. The sports hall has a timber finish with the appropriate line markings and drop down sports equipment eg. ball nets.

The lighting has been increased from 200 to 400 lux lighting to allow the sports hall to be used for examination purposes also.

Construction is steel framed with elevations predominantly in composite metal cladding beneath a curved insulated metal panel roof. The cladding is of fortcrete block finish.

Ancillary accommodation is to be of load-bearing brick and block construction beneath a single ply membrane covered timber framed flat roof.

Value

£941k

Contract Period

15 weeks August 09 - May10
