Description

A new 3-storey teaching block constructed within the live college campus for the lower school. The construction was steel framed with masonry walls and a Glu-Lam beam roof construction under a traditional slate roof. The contract was a great success and as a result, we negotiated further work with the Client by way of a new £1,000,000 sports facility.

Value

£1,000,000

Contract Period

10 months

Client Supervising Officer
