

# Keele IC1 Med 1

## Description

The first of our four Innovation Centres constructed at Keele University and followed on from our Construction of New Restaurant and Exhibition facilities in the Centre of the existing Campus. The building consists of a steel frame with a mixture of composite cladding and facing brickwork. Constructed on a sloping site. The Main Reception is located at 1st floor level via a walkway from the upper car park. The building has the facility to be split into a number of separate units to maximise flexibility. IC1 was officially opened by her Majesty The Queen.
