

Helios City Buckshaw Link, Chorley

Description

The project involved the construction of 8 large industrial units within the Helios City plot of the Buckshaw Village development. Several of the units were split forming a total of 20 pods each with ground floor core area and fully fitted out first floor offices. The project was completed in 2 back to back phases under a very tight programme. Most of the units were of single span monopitch construction with some traditional portal framed buildings used.
