

Tesco Distribution Centre

Description

Design and build project on a green field site involved constructing a new road to the site incorporating a bridge over the river. The main building is a distribution centre to service the North West and North Wales. It features 32 dock levellers on the incoming side and 32 on the out-going side. The ground floor is given over to the main warehouse, toilets, canteen, restrooms, battery charging room and fully equipped garage. The first floor consists of offices, conference facilities and UPS rooms. Externally, there is a works car park, gate house, full security fence, fuelling area, weight bridge, internal and external trailer washing facilities, landscaping scheme and new sewage
