Type of Contract

Traditional with Elements of Contractor Design

Description

The project was a highly bespoke demolition and rebuild of a craft centre. It consisted of 6No self contained studio workshops, multiple adaptable gallery spaces, retail, residency, education and tourist information areas. The building is designed and constructed with the gallery spaces to have as much flexibility in abeyance as possible with neutral walls and a lutron lighting system. Externally tilt up concrete walls and zinc cladded roof were used to emulate the Clwydian mountain range beyond.

Value

£3.3m

Contract Period

68 weeks
